

EN Speech

Morning , guys .

If U ask me , what is Chinese Dream ? What I could tell you is that “ that’s a dream belongs to all the Chinese , my friend ” .

And , what is the matter ? It seems so far from us that I can just try to explain it through what really really happened to me these years .

I come from Liao Cheng , one of the poorest cities in Shandong Province . As a kid , adults told me to be glib(圆滑的) , to be smart and vigilant(警惕的) . Because survival was a daily struggle . We farmers’ kids would spend most of our time on doing the farm at any time and anywhere when students in the city reading ,writing or riding . We also want to change our life throw reading , but we can’t , we can not . I had never found the hope on that moment . And all my dream was go out and never never never back again .

However , something has changed these years . Nowadays, our country strongly encourages young people to return home to help their hometowns . More and more people who succeed in their domains , which also brings the light of knowledge to their hometown . And as you see , I’m out now , but I’ll back

again and again to donate my body , my blood , my heart and everything I have to make my hometown better . As the saying goes, he who has been through the rain wants to hold an umbrella for others .

Now , a deep concept hits me that the ground under me and U is our hometown , which is called China . And then , the dream inside U and me is our dream , which is called Chinese Dream .

Did U find it ? Chinese Dream is not a bit mysterious and not far from us at all . It will not harm others for its own benefit in the name of democracy and freedom like what the United States and the West had done in Garza . We all want to make our road wider , sky bluer , water clearer , air fresher and people happier . That is the Chinese Dream in my heart . A peaceful dream . A harmonious dream . And it's also the dream of people all over the world .

Thank U . Thanks for listening .
